The Commonwealth Business Council will be hosting the Sierra Leone Investment Forum in March.

After years of civil strife, Sierra Leone is at peace. Security and stability are restored, democracy and accountability firmly established, and the rule of law prevails on the basis of a solid constitution. There has never been a better time for international investors and entrepreneurs to take a look at a country on the verge of recovery led growth.

investors, issue of hostage taking has taken center stage in the Niger delta region and its implications for the Nigerian economy. This is coming at a time when the Ease of Doing Business Report was released and Nigeria ranks a dismal 94th. Just while we are still at the brink of encouraging investors, the issue poses a great challenge to the investor drive of the nation. More significant efforts should be made in addressing this issue, as it appears that militants who claim to be representing the interest of people in the Niger Delta are getting more daring with their activities and for the interest of current/potential investors, this act should be curtailed before it escalates. We do not believe that attacking these communities where government claims the militants are hiding will augur well for the economy and indeed security of our nation. One of the ways of addressing the grievances of the people of the Niger Delta is to listen, empathise and find sustainable ways of alleviating their problems.
